

K-love serves a very unique role on the airwaves. It is a station that is one of the only family friendly stations available. Nothing needs to be censored from children. It is positive and only up lifting also providing information of local church events. The effect on the local community will be very negative! We depend upon the K-Love station as a station that is positive and uplifting, informative and child friendly. The radio will be used less often due to the lack of child friendly stations if the FCC removes the station from the high power FM.
